CHINESE MAGNOLIA (Magnolia Soulangiana)

This magnificent Magnolia truly is the aristocrat of all flowering ornamentals. It produces immense 3- to 5-inch flowers in the spring before its leaves unfurl. Leaves are large and glossy. A highly ornate specimen at all times of the year. Grows 18 to 20 feet tall. Admirers will come by your home just to see its amazing beauty. This variety is the hardest and adapted to northern climates. 2-yr., field-grown, ready to bloom, 15 to 20 inches.

2 for \$3.00; 6 for \$8.00.

Quality Plants, Northern Grown

Our Sincere Efforts

PRODUCE SUPERIOR RESULTS

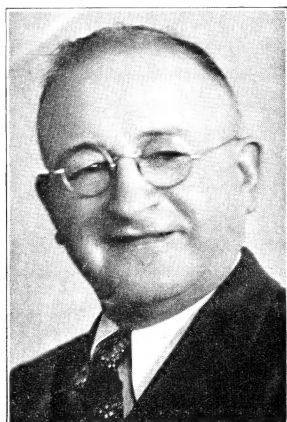

FOR OVER 20 YEARS we have been producing extra heavy bearing strains of nursery stock incomparable with ordinary nursery stock. We derive this by the results of long experience, careful selection of breeding stock and up-to-the-minute farm machinery. In turn the advantage to our customers is a heavier yield and bigger dividends.

Hardy Northern Grown

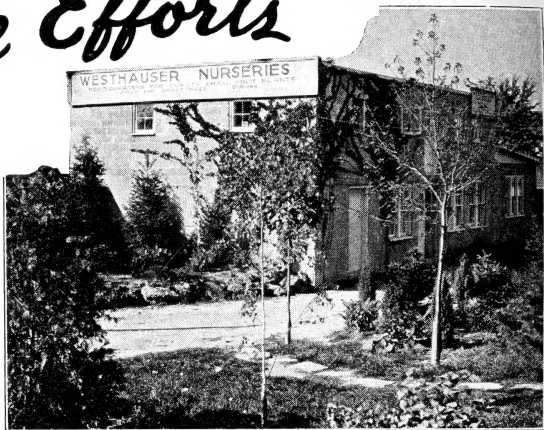

Our NORTHERN CLIMATE is ideal for growing thrifty, hardy nursery stock, because we are located so near Lake Michigan, which puts a damper on our winters, making the climate such that our nursery stock is practically dormant until late in the spring. Bear in mind, Mr. Fruit Grower, plants that are dormant so late in the season, have little foliage and carry well in transit. That is one reason why our plants can be shipped long distances with the best of results.

No Effort Too Great for Additional Fertility

We make a practice of feeding live stock. The photo at left speaks for itself. We do not sell pigs in our catalog, neither are we in the hog business for profit, but no effort is too great to keep our producing soils in the highest state of fertility, which means **Thrifty, Heavier Rooted Nursery Stock.**

WM. WESTHAUSER

Westhauser's Up-to-Date Packing House and Office

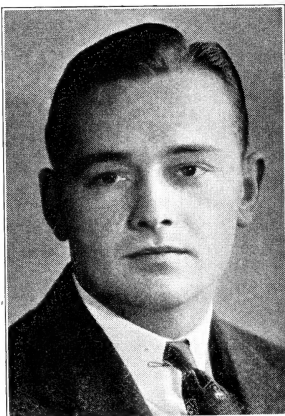

Seeing is Believing

Mr. C. W. Lininger of Michigan says (7-20-41):

"I want to thank you for your time and courtesy in showing me over your nursery farm.

"I enjoyed my visit and am sure you are doing a very fine job of producing plants of all kinds. The quality of your plants is of the best."

R. E. WESTHAUSER

Our Broad GUARANTEE is Your Protection

WE GUARANTEE that our nursery stock is first class in every respect, free from disease, freshly dug, true to name, and to reach you in good growing condition. We will, at our option, either replace free of charge or return your money on any shipment which arrives in bad condition, providing claim is made within five days after arrival of shipment, with a signed statement from your Express Agent or Postmaster, showing the extent of damage.

Our stock is carefully handled and full of vitality, and under ordinary conditions should grow for you. But if it does not, owing to the weather and other conditions over which we have no control, we will replace it at half price the following season, if you notify us not later than October 1, 1943.

It is understood between purchaser and ourselves that we are not liable for any greater amount than paid for stock.

HOW TO ORDER

WHEN TO ORDER. Order now on receipt of this catalog or as soon as possible thereafter and we will reserve your stock for you. Orders are booked in the order they are received and we ship as near the date requested as possible, according to weather conditions. Shipping date March 15th to the latter part of May.

HOW TO ORDER. An Order Blank is provided herewith for your convenience. Fill out clearly and be sure to print or write your name and address plainly, thus avoiding errors and delay. Remit by cash, money order, or check. If cash is remitted, be sure to register letter.

PAYMENTS AND TERMS. Cash with order; however, if your order amounts to \$5.00 or more, we will book your order with 25% down and balance 10 days before you wish your stock shipped.

INSPECTION CERTIFICATE

MICHIGAN STATE DEPARTMENT OF AGRICULTURE

Orchard and Nursery Inspection Certificate of Nursery Inspection No. 1043

This is to certify that the Nursery Stock of Westhauser's Nurseries, Sawyer, Mich., has been examined and found to be apparently free from dangerous insects and dangerously contagious tree and plant diseases.

Fee paid.

LEO V. CARD, Commissioner.

This certificate to be void after September 15, 1943, Bureau of Agricultural Industry, C. A. Boyer, in charge of Orchard and Nursery Inspection, Lansing, Mich., September 2, 1942. First Inspection, August 20, 1942.

VITAMIN B₁

You've Heard Of It — NOW TRY IT

Vitamin B₁ reduces the shock in transplanting. HOW TO USE IT: Dissolve 1 tablet in gallon of water, sprinkle plants immediately after transplanting. In case plants, shrubs or trees are already planted, soak soil around the roots with solution. Dormant or barerooted plants should be soaked in solution not less than one-half hour or more than one hour before planting. Endorsed by leading agricultural and horticultural papers.

NEW! 3-ON-1 EUROPEAN BIRCH

One of the most beautiful Novelties in shade trees. On matured trees the bark is white and leaves are of a fine green. This rare picturesque Clump combination will win the admiration of your friends and neighbors. Heavy rooted, 3 to 4 ft. trees, \$2.00 each; 3 for \$4.50.

Rose Tree of China

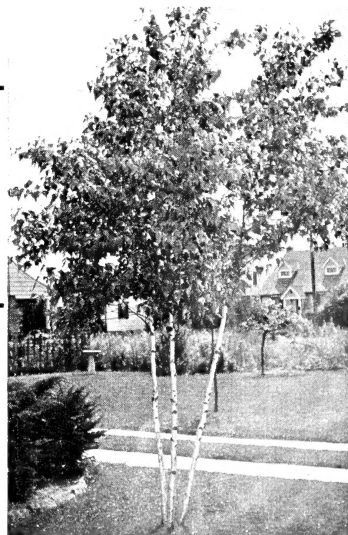

For Victory Assortment see pages 5 and 23.

Westhauser's ROSE TREE of CHINA 2 for \$1.25

The earliest flowering hardy tree-shrub of deep pink. Double blossoms appear in great profusion before the leaves, completely covering the branches with what appear like small pink Roses. One or two should be in every planting.

Prices: 2½ to 3 ft. trees, 75c each; 2 for \$1.25.

3-On-1 European Birch

GIANT
HYBRID

Blueberries

- Profitable
- Beautiful
- Very Ornamental

Big Success! Prosperity Creator for Commercial Grower

Local fruit growers here in Berrien County have been planting in acre lots, and are reaping a rich harvest, also each year increasing their plantations.

The Cultivated Blueberry produces juicy, delicious berries two to three times as large as common Huckleberries, resembling in size a bunch of Delaware grapes, and selling for 40c to 60c a quart.

CROSS POLLENIZATION. At least TWO PLANTS should be planted for cross pollenization. This insures more berries.

Grow Blueberries at Home

These beautiful ornamental bushes grow 8 to 10 feet high, have pinkish white, bell-shaped blossoms with long, narrow, dark green foliage that turns coppery red in fall. Will ornament any home garden.

Fancy 1-Year Plants — Vitamin B₁ Treated GUARANTEED TO START

Before shipping, the root system of each one-year-old plant is treated with a Vitamin B₁ solution, then bedded in Peat Moss and wrapped in wax paper. This is certain to give the plants a very much easier start. These plants are especially recommended for the commercial grower. WRITE FOR PRICES ON QUANTITY LOTS.

2-Year Transplants

GAIN A YEAR by setting these nicely branched, 2-year transplants with correspondingly heavier root systems. Packed in Westhauser's Blueberry Grower (see next page), that can be used in transplanting.

3-Year Transplants — Will Bear This Year

Heavy branched canes whose root systems are comparatively heavier, with a good setting of fruit buds; will bear this year. Packed in Westhauser's Blueberry Grower (see next page), which can be used in transplanting. 12-15 in. plants. See special offer on next page.

4-Year Transplants — 18-24 Inch Plants

Thrifty, well proportioned bushes! Near the full-fruiting stage! Well packed in Westhauser's Blueberry Grower (see next page), which can be used in transplanting.

THREE PROVEN VARIETIES

After much experimenting and study we decided on the following varieties and will supply our trade as long as they last. However, we reserve the right, in case we are sold out of some variety, to substitute any of the three.

RUBEL. The outstanding early midseason berry. The bush is upright, very vigorous, hardy and productive. Large fruit borne in a cluster. Good shipper.

RANCOCAS. Vigorous, upright grower. Very productive. Fruit sweet and fine flavor. Ornamental. Fruit borne in clusters. Midseason to late.

JERSEY. Ripens a few days later than Rubel. Bushes grow upright, fruit is large and firm, good quality. The choice of the commercial growers.

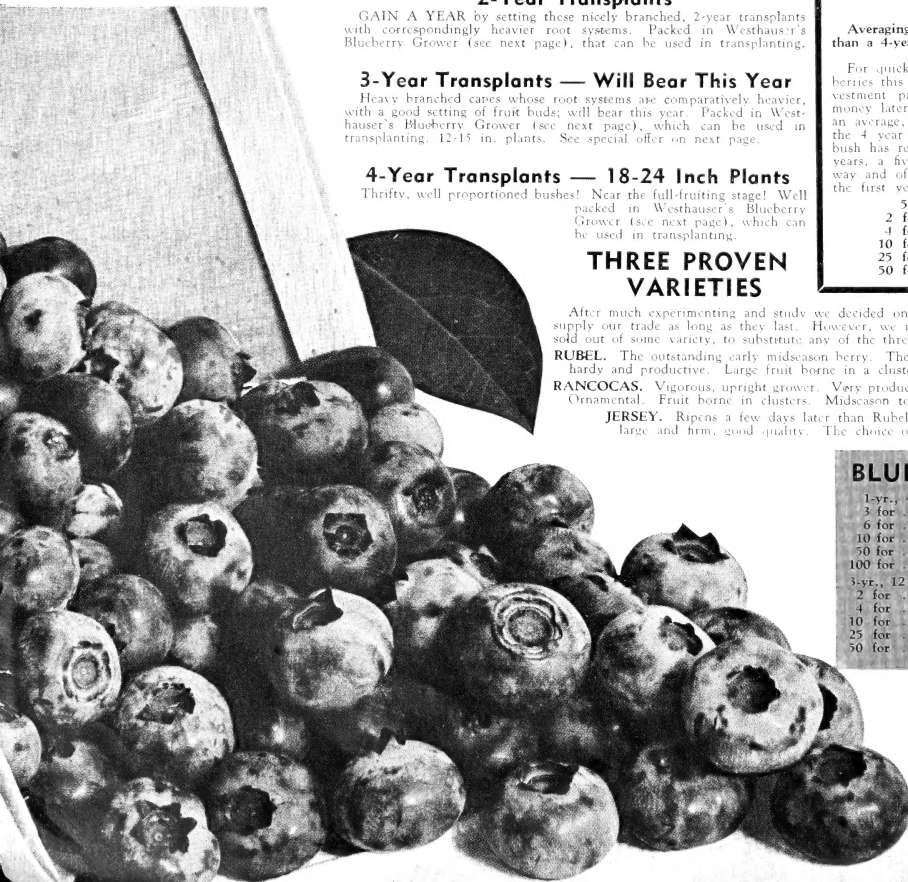

5-YEAR TRANSPLANTS

2 1/4 to 3 ft.

Averaging about 50% more berries than a 4-year bush.

For quick results and a good crop of berries this year plant these plants. Investment paid in a short time! Big money later. Five year transplants, as an average, bear 50% more fruit than the 4 year old plants. Considering a bush has reached full maturity at nine years, a five year bush is well on its way and often pays more than its cost the first year.

Westhauser's XXX Blueberry Grower

HOW TO GROW BLUEBERRIES SUCCESSFULLY

Make openings three or more times larger than the roots, large enough to receive all the roots without crowding. Mix the dirt removed from holes half and half with Westhauser's XXX Blueberry Grower, or some acid material such as decayed leaves, rotten straw or vegetable refuse, firm this well around the roots of the plants. We recommend that a handful of sulphur be put around each plant in the spring. Give the one-year plants one-half ounce of Sulphate of Ammonia, for the older plants increase one-half ounce for each additional year. Do not let the Sulphate of Ammonia get in contact with the foliage. This can be purchased

at your local feed or hardware store, and is very inexpensive.

The shipping weight of Westhauser's XXX Blueberry Grower for one sack or two-bushel bag is approximately 50 to 75 pounds. Have it shipped early by freight and save on transportation. Later in the season we advise express, as freight is slow.

PRICES: 1 bag (2 bus.), \$1.00; 2 bags (4 bus.), \$1.90; 5 bags (10 bus.), \$4.00; 11 bags (22 bus.), \$8.00. These prices are net, no discount or free goods allowed.

Westhauser's SOIL KING

Nature's Own Plant and Soil Builder or Rejuvenator

Your plantings are doubly assured with Westhauser's Soil King, which has been tested and recommended by County Agents, also State Departments of Agriculture who find it has a perfect acidity test. Not only is it highly acid, but it contains all of its original vitamins; it is high in nitrogen, and plant food. We were fortunate in securing a large acreage of this amazing organic substance containing all of its virgin elements, and are happy that we are able to give our customers the advantage of this wonderful natural plant food and soil builder for more profitable plantings. The area or

bed of which we speak is a drained lake bed of clean, odorless, highly vitalized, decomposed pure vegetation that has never been touched by man, in all probability this deposit has been collecting for millions of years. It is ideal for lawns, flowers, etc. Absorbs 15 to 20 times its own weight in moisture. Weight of one 2-bushel bag is approximately 50 to 75 pounds.

PRICES: 1 bag (2 bus.), \$1.00; 2 bags (4 bus.), \$1.90; 5 bags (10 bus.), \$4.00; 11 bags (22 bus.), \$8.00. These prices are net, no discount or free goods allowed.

OTHER USES FOR WESTHAUSER'S SOIL KING

NEW LAWNS. Loosen about 6 inches of soil, mix thoroughly with 1/2 to 2 inches of Westhauser's Soil King, then level lawn and seed. Water thoroughly. If soil is acidic use a little lime at time of planting.

OLD LAWNS. Mix 50-50 with soil and top dress.

FLOWERS AND VEGETABLE GARDENS. Turn soil over from 8 to 12 inches, spread with 1 to 3 inches of Soil King and mix. For acid-loving plants use more liberally.

TREES AND HEDGES. Use about 40% Soil King when planting. If established, mix top soil around plant with 1 to 3 inches of Soil King.

ROSES AND SHRUBS. Insure thrifty growth, quicker blooming by mixing one-third Westhauser's Soil King with two-thirds soil when planting.

EVERGREENS. Azaleas, Rhododendrons, etc., thrive best on moist, acidic soil. Mix Soil King 50-50 with soil for new plantings, and 3 to 4 inches on established plantings.

MULCHING. In summer use 1 to 3 inches Soil King around each plant, this prevents crusting and soil drying out. In winter use 4 inches Soil King around the base of trees, roses, etc. It is the perfect mulch, as it protects plants, preserves the roots from winter killing, and prevents heaving.

BLUEBERRY GROWER and SOIL KING are offered practically at cost to doubly assure our customers of success; therefore, prices are net and we positively cannot allow discount or free goods.

The New Thornless

10 to 14 Days Earlier Than Regular Boysenberry — and No Thorns!

Early! Big cash money. Bears ten days to two weeks before the regular Boysenberry (its parent). This is a decided advantage for the grower who wants to get his berries on the market when prices are at their peak. (The early bird catches the worm.) Being early does not conflict with the Thorny Boysenberry, as the Thorny starts to produce ripe berries after you have cashed in on the Thornless. The production of the Thornless is even greater than the regular Boysenberry, which has produced over six tons per acre.

FLAVOR is a wonderful, pleasing combination of Raspberry, Loganberry and Blackberry. It's of a sensational, satisfying taste with unmatched qualifications, something you will long remember in pies, jams, jellies, cordials, canned or fresh.

VINES are smooth, resembling a grape vine with shoots from 15 to 20 feet long. Easy to pick and handle—means a labor saving not only to the commercial grower, but also to the home gardener.

Buy a Proven Strain

The Thornless Boysenberry is a sport or offspring of the regular Thorny Boysenberry. While many Boysenberry plantings have had occasional thornless "sports," they have been found to be valueless. Let that be a warning to the wise, be sure to get your plants from a proven strain. The sport our strain originated from is a distinctive success.

OUR PIONEERING — YOUR SUCCESS

Being pioneers in propagating and growing Boysenberries, we offer you Northern Grown, Healthy, Heavy-Rooted plants, tested and hardened to the northern climate and proven to withstand sub-zero weather splendidly. This is your insurance of success.

Photograph taken in early spring to show clearly how to arrange Boysenberry canes on wire for best results

HOW TO GROW BOYSENBERRIES (Both Types)

Set plants 8 by 8 feet apart, both in and between the rows, as the root system spreads out considerably in search of moisture and plant food. The Boysenberry makes a very thrifty growth the first year. The vines often grow 10 feet. Let the vines creep on the ground the first year, and in the more northern states, the extreme North, cover lightly with straw, leaves or soil before the hard freezes begin, just to be on the safe side. In the spring remove this covering, and when the Boysenberry commences to bud, tie the vines to a trellis or wire, stretched on posts about 2½ feet from the ground. Right after fruiting, cut old vines down to ground, remove and burn them, this throws all the strength and energy into the roots for producing young vines, as it is these young vines that bear the fruit crop the following season. As outlined above, leave the young vines on the ground during fall and winter; in the spring, tie them to the trellis, etc. Repeat this practice year after year.

Boysenberries

WESTHAUSER'S Heavy Bearing Strains — Established Money Makers

Regular Boysenberry

(THORNY)

The regular Boysenberry has been exploited and recommended the past few years by the leading editors of nationally known Farm and Garden magazines. This thrifty, robust growing plant is a true big money maker. It has produced nearly 6 tons of berries per acre which sold for over \$1,737.00.

Our plants being northern grown will succeed better in any climate. They have been hardened and are adapted to most northern climates, as they have withstood 40 degrees below zero temperatures splendidly.

VINES are thrifty and often attain a growth of 15-20 feet. Berries measure from 1½ to 2 inches in length, and are of a beautiful purple wine color.

FLAVOR is a combination of Blackberry, Red Raspberry and Loganberry, and is less seedy than any of the three. The outstanding sensational flavor, either fresh, canned or in pies, jams and jellies, is something that will linger and make you anxious for more.

Golden Queen RASPBERRY

Six Extra Large 2-Year Plants Only \$1.85

This rich golden yellow Raspberry is not only a novelty but in many cases is grown in preference to the red and black Raspberries because of its sugar sweet flavor. Plants are vigorous growers, berries large, and immense producers. Get some for your garden now.

Maytime

MAYTIME U.S.D.A. 2267

—Earliest of All—

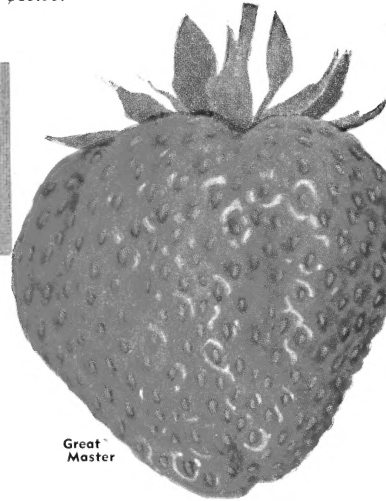

EARLIEST COMMERCIAL variety. Originated by Dr. George M. Darrow, our federal strawberry expert. It is a cross of Missionary and Fairfax. It has proved to be a vigorous grower, has made full rows of plants for us here in Michigan. The beautiful red color of the berries is darker than Blakemore and lighter than Premier. They do not turn dark on holding. The extreme earliness is its outstanding point of value. Four good reasons to try Maytime in your locality. The BEAUTY, EARLINESS, FIRMNESS and QUALITY of Maytime make it a winner. Prices: 25 for 75c; 50 for \$1.25; 100 for \$2.00; 200 for \$2.90; 300 for \$4.25; 500 for \$5.25; 1000 for \$10.00.

Great Master

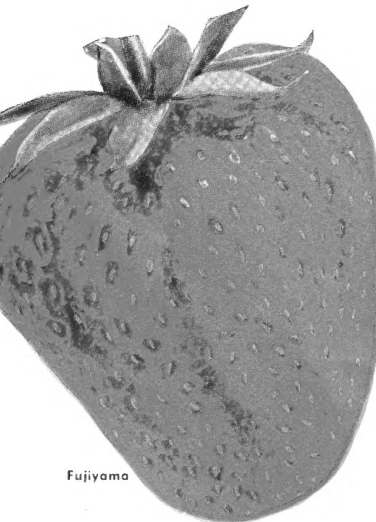

GREAT MASTER

A New Late Money-Maker

Great Master is a seedling discovered fruiting a few years ago. For years we have scoured the country over for just this type of a real worth-while late berry. After watching Great Master and putting it through the most rigid tests we were amazed to find it really exceeded our fondest hopes. It is a large, real firm, fancy, glossy berry with a superb flavor of its own, outbears other late spring bearers two to one. The flowers are self-pollenizing.

The plants are large and thrifty, make many runners, but space their plants far enough apart to insure large size berries; they ripen about three weeks later than Premier and mature every berry to full size.

We feel that we have done the Strawberry world a real service by adding such a valuable variety to the Strawberry family. Watch Great Master, buy a few plants and be the first in your locality to grow this outstanding wonder berry, prolong your fruiting season and have fancy berries when others are gone. The supply of plants of Great Master is limited. Prices: 25 for 75c; 50 for \$1.10; 75 for \$1.60; 100 for \$1.90; 200 for \$3.50; 500 for \$6.75; 1000 for \$12.50.

Fujiyama

FUJIYAMA

Was originated in the Orient. It is the largest Strawberry ever grown, some berries measure 7 inches around, and weigh up to two ounces. These large, sweet, delicious berries are excellent for home use and nearby markets as they are almost too large for long distance shipping. Makes a beautiful plant and picking row. Very productive. Ripens midseason to late, and holds its size well until the end. Prices: 25 for 75c; 50 for \$1.25; 100 for \$2.00; 200 for \$3.00; 500 for \$5.75; 1000 for \$10.00.

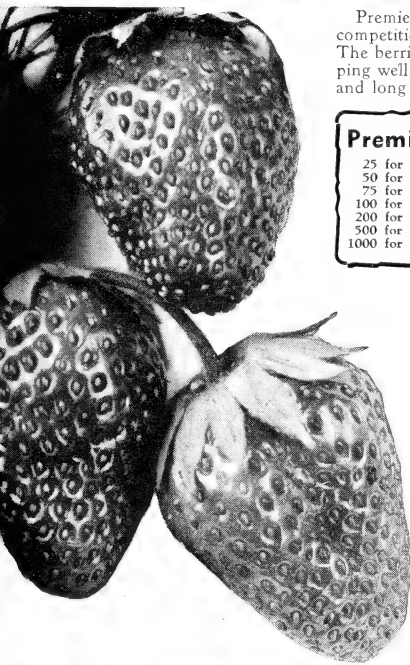

2-COLOR ALTHEA →

SPECIAL—NEW—NOVEL. Red and white blooms on one bush! Be the first in your neighborhood to grow this unusual Beauty. Price: Large 2- to 3 ft. bushes, each \$1.00; 3, \$2.00; 6, \$3.75.

PREMIER

Early—Most Profitable

Premier is the earliest Standard Strawberry to ripen. It gets on the market when there is no competition, thus it receives the highest prices. This fact alone makes it a great money maker. The berries are large, of a beautiful glossy red appearance, very firm and stand long distance shipping well. It holds its size to the last of the season. Premier is supreme for eating, canning, local and long distance marketing. It is a Strawberry for every purpose wanted. The plants are very productive, sturdy, long rooted, good drought resisters, and make good on any kind of soil.

Westhauser's Improved Strain are in a Class by Themselves

On our farms we have grown Premier for eighteen years and are known throughout the country for our vigorous, productive stock which has been built up to present perfection. Get started right and buy WESTHAUSER'S IMPROVED STRAIN.

CATSKILL is Truly Profitable

New Giant Midseason Berry

Fruit buyers, so amazed at the size of the Catskill berries grown on our farm, tipped out a box and counted twenty-six berries to a full quart.

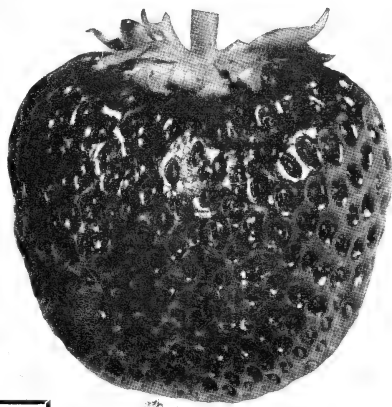

Produced 32,000 quarts from 3 acres; sold on wholesale market for \$3,500.00.

Catskill is self-pollenizing; the berries are dazzling bright red, like Premier, size like Fairfax or larger, on strong fruit stems,

Produced at the Rate of
10,000 Quarts Per Acre

Dear Sir: From your 2000 Premier plants I harvested 2400 quarts of No. 1 berries last summer. I did not keep count of the smaller berries. I am going to plant three to five acres.

MRS. F. L. DAVIS, Virginia

A Satisfied Customer Says:

My 1500 Catskill plants arrived in good shape and were big, vigorous-looking plants. You need not worry about your future success if all your customers are as well satisfied as I am.

DO NOT WRITE ASKING US TO GIVE YOU NAMED VARIETIES. If you want labeled plants, order at regular catalog prices. THESE PLANTS WILL NOT BE SOLD IN LESS THAN 500 LOTS.

NET, NO DISCOUNT

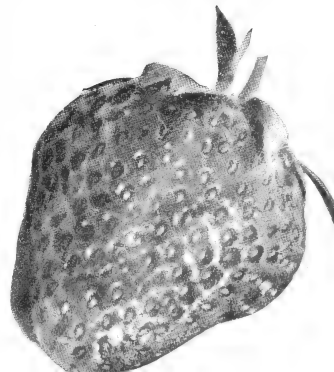

DUNLAP

The Old Standby

The berries are medium to large, conical and often slightly necked, dark crimson with a deep red flesh, quality very good. The plants are healthy and vigorous. Very productive. Grows on all kinds of soil, and in extremely cold climates. The best variety for canning and a good pollinizer for pistillate varieties. It can be shipped to distant markets. Holds up a long while after being picked. Season a few days after Premier begins bearing.

Westhauser's WAYZATA

The Perfect Honey-Sweet
Everbearing Strawberry

OUTBEARS ALL OTHERS

Wayzata, with all possible good points desired in an everbearer. A large, uniform, firm berry, red to the core, even color all over, no green tips, drought resistant, honey-sweet flavor, and outbears all other Everbearers three to one. The originator stated that he picked from June to October 901 crates from $3\frac{1}{2}$ acres, which sold for \$3,100.55.

Without contradiction the best flavored Everbearer today. Customers who have tried Wayzata in a small way come back with larger orders every year, in spite of being higher in price than other Everbearers. They lose no time repaying your investment, bear the first crop 60 days after being planted until November, again a fine crop next spring and the third crop from July until snow flies, and holds its size well to the end.

Wayzata is very hardy, stands 30 below zero weather, is adapted to a wide range of soils, from clay to sandy soil, the plants are large and extra heavy rooted. The foliage is dark green, stands 8 to 10 inches high, the leaves are thick, leather-like, free from leaf spots and other plant diseases. The crowns often multiply tenfold or more which accounts for their heavy fruiting quality. However, since they are busy directing their energy to fruiting, they do not make as many runner plants as other Everbearers, which, together with the great demand, keeps the price of plants rather high. That is

the reason why the plants are scarce and will be for some time to come. The Wayzata has been a "sell out" with us every year and we were obliged to return many orders. To be on the safe side, order early and have your plants reserved.

We have an extremely short crop this year. Advise our customers order early as we anticipate an early sell out.

Wayzata Clump or Combination Plants

Grow to Enormous Size — Often 12 to 15 Inches Across.
25 Plants Will Supply the Average Family with Berries
During Summer and Fall the First Year.

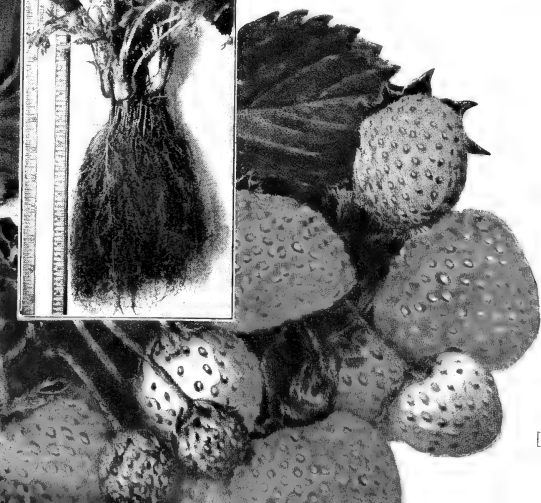

The Wayzata makes runner plants in limited quantities, but joins a number of new plants with new roots to the mother plant. This combination of plants appear as one large plant with a number of crowns, which is the reason the Wayzata outbears all other Everbearing Strawberries. Nature provides each crown with a number of fruit stems and blooms which are formed before winter, remaining dormant until plants are transplanted in spring, which come to bloom shortly after.

We have counted 25 fruit stems on a single Clump plant, the plant you see at the left has six crowns and could be divided in that many plants for individual planting. Clump plants will grow easily with such a mammoth ROOT system to start with. Pick the first blooms off the plants, which will appear right after planting, a new set of blossoms will follow and in three weeks later the first berries will ripen. We recommend these large plants for hill system culture, specially for small, rich garden plots, planting them 20 by 20 inches apart. We have sold some orders in large lots and our customers had excellent results, ordering them in 1000 lots.

New GEMZATA

A New Everbearer Combining Many of the Best Features of its Famous Parents, "Gem" and "Wayzata"

The Gemzata is a cross between the "GEM" and "WAYZATA." It is a good plant maker, and the glossy, healthy foliage is a shade lighter than that of Wayzata. Gemzata starts to bear about ten days earlier than either Gem or Wayzata; the berries are a trifle lighter in color, but resemble Wayzata in size and flavor. Only a few thousand plants available. Prices: 12 for \$1.00; 25 for \$1.75; 50 for \$3.00; 100 for \$5.50. Net, No Discount.

MASTODON Everbearer

Double Your Crop — Plant Our Heavy Fruiting Strain

Since vigor and energy of a plant are stored in the roots and crown, and since these plants have been improved each year by careful selection, such as we practice, you can readily appreciate that you get the best at no extra cost if you order your Mastodon plants from us. We sincerely believe that you cannot buy better plants no matter under what trade name advertised or what price you pay.

The Crimson Everbearer

EVERBEARING COLLECTION No. 100

200 Gem (Crimson Everbearer)
25 Gemzata

\$3.49 Net, No
Prepaid Discount

Westhauser's Gem are grown on new land with all its plant food and mineral elements untouched, therefore, they are **outstanding for vigor and health**, have extra heavy fibrous root system.

FOLIAGE. For an Everbearer, GEM is a heavy plant maker and produces a larger fruiting row than any other Everbearer we know. The plants are very hardy, not subject to leaf blight.

SIZE AND APPEARANCE. The berries are large size, very uniform and hold their size even throughout dry weather. The color is a deep red, very glossy, and they have a very fancy appearance.

FLAVOR. The berries are very sweet and have a flavor like the Progressive variety. The flesh of the berry is very fine grained and red clear through. Very little sugar is necessary to bring out the flavor.

FIRMNESS. The berries are extremely firm and stand long distance shipping well. If you are in the market for an outstanding firm and fancy Everbearer, try GEM this year. Play safe, order now.

Original Grand Champion

*Only from WESTHAUSER can
You Buy the Original Strain*

Longest Season June-Bearer Ever Developed

Grand Champion was found as a single seedling on a decaying tree stump, produced 30 plants, which were set out on a space of 66 square feet. We harvested 105 quarts of berries off this setting the next spring.

Enormous Cropper—Over 13,400 quarts per acre—Bears over 40 days

During harvest this year we picked 1920 quarts from a trifle less than one-seventh of an acre or the equivalent of 13,440 quarts per acre. We began picking the middle of the Premier harvest and were still picking Grand Champion with the later varieties.

Frost Protection

The Grand Champion blooms over a long period. Blossoms are protected from late spring freezing by its tall mass of foliage.

Berries of Finest Quality

For canning and preserving they are in a class by themselves, as they are coreless and retain their shape and flavor in the can. Their rich red color, the extra large size, beautiful appearance and high quality attract the fancy fruit buyer. We have received a premium on our Grand Champion ever since we have grown them.

You can secure the ORIGINAL STRAIN
ONLY from WESTHAUSER'S.

What Our Customers Say About Grand Champion

I want to write you about my Strawberry plants which I purchased from you last year. I was pleased with the Grand Champion—had a wonderful crop of excellent quality. I set several varieties which were good, but nothing compared to Grand Champion.

Yours truly,

ALVIN NITZ, Wisconsin

Five fine Peach varieties all on one tree: Elberta, Golden Jubilee, J. H. Hale, Belle of Georgia, and South Haven. It takes little space and will furnish you with Peaches from middle of August until the first of October. Order now. We offer these trees in 11/16 in., 5-6 ft. size, \$1.50 each; 3 or more at \$1.35 each, less discount.

Westhauser's BLACKBERRIES

CERTIFIED FREE OF DISEASE by Michigan State Department of Agriculture

Eldorado
Blackberry

Two-Year Bearing Size TRANSPLANTS

If you want a crop of Blackberries this year, our transplanted root cutting plants will do it. They are sturdy and have a fine root system. They have been reset in nursery rows for two years, and will bear fruit a few months after planting.

ELDORADO Productive, Firm and Profitable

The choice of the commercial grower and housewife for the good old-fashioned jams, pies, preserves and fresh fruit for the table, coming just after raspberry season, when but little other fruit is available. They ripen 10 days after dewberries and the harvest extends to the fore part of September; they are the last of all spring and summer berries in the season and the trade is willing to pay well for them. The canes grow sturdy and upright, and are hardy enough to need no winter protection.

The berries are large, uniform in size, jet black, and do not turn red after being picked. They have a flavor that always calls for more and are firm enough to ship to distant markets, assuring good prices.

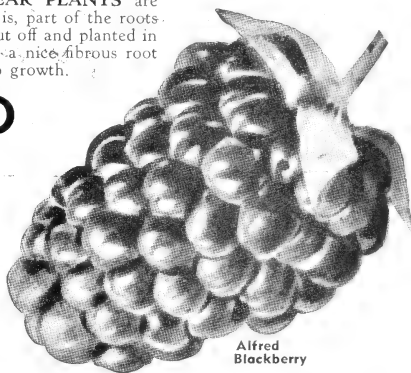

Its hardness and freedom from disease, especially orange rust, the common enemy of all Blackberries, has made ELDORADO the leading variety with the commercial grower.

ELDORADO 1-YEAR PLANTS are individual plants; that is, part of the roots of the old plants are cut off and planted in spring. They produce a nice fibrous root system and a good top growth.

ALFRED

The Coreless Blackberry

The coreless Blackberry, originated in Michigan, the state that produces fruit with the flavor. The color is a glossy jet black, the flavor sweet and delicious, and it is nearly seedless and coreless. A hardy plant that produces mammoth berries, often $1\frac{3}{4}$ inches long. It does equally well in cold sections. Why not include a few in your order and get started raising this profitable berry?

Beautify Your Home and Grounds with **WESTHAUSER'S EVERGREENS**

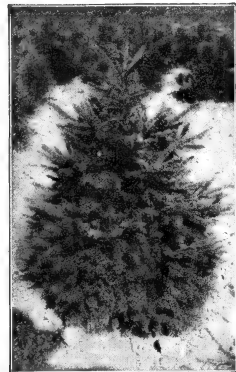

Norway Spruce

NOTICE

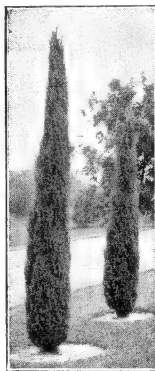

We recommend these heavy rooted transplant evergreens, which can be shipped by mail. If properly planted should make a 100% growth.

Colorado Blue Spruce

Black Hills Spruce

Irish Juniper

COLORADO BLUE SPRUCE. Its steel-blue, glistening foliage makes it desirable for lawn or grouping. Nice bushy trees. Will make rapid growth from now on. They have a wonderful root system; twice transplanted; packed with sufficient peat moss to insure good growth.

BLACK HILLS SPRUCE. The hardiest of all Spruce. Bushy in habit, and symmetrical. Foliage varies from a bright green to blue tint. Slow grower, often seen in foundation plantings.

CHINESE JUNIPER. A rugged conical tree with prickly dark green foliage and large berries.

BRISTOL BLACK RASPBERRY

This is one of the newer and considered one of the best medium to late Black Raspberries. Harvesting time is a few days ahead of Cumberland. This introduction was made at the New York Experiment Station. Bristol has proven itself to be one of the foremost Black Raspberries of today. Fruit is large and of a glossy black, and is very showy, firm and of excellent quality. Supply limited. ORDER NOW.

Best medium to late variety, has made good in all sections of the country. Was originated in Minnesota; does not winter-kill even at 45 degrees below zero. The large, beautiful, rich dark red berries often measure an inch in diameter, are firm, excellent for canning and shipping as well as for table use.

CUMBERLAND

The Leader of All Blacks

The leader of all Black Raspberries. Does well in all climates on any well drained soil. Buyers pay top-notch prices for these attractive, large, rich Black Raspberries. Excellent fresh or for table use and canning.

[15]

New!

EARLY WONDER THORNLESS

Trademark Applied For

IT'S EARLIEST AND IT'S THORNLESS!

This variety was discovered here in Michigan several years ago by Mr. Henning, who found it growing in a patch of Lathams. Now he grows the Thornless Red Raspberry EXCLUSIVELY. Early Wonder is a combination of tested and proven merits. The large and sturdy plants have silky smooth wood, no stickers. The berries are borne in large, beautiful bright red clusters, and are very firm, excellent shippers. A delicacy either fresh, canned, in preserves and jellies.

Seeing is Believing

Wide awake local fruit growers have watched this berry with keen interest and have paid fancy prices for a few plants to get started and cash in on the early profits.

IT MUST BE GOOD, as these fruit growers are constantly enlarging their plantings and are discarding other varieties.

Earliest! One 24-Pint Crate of Early Wonder Brought \$13.00

Being the EARLIEST, one of the first 24-pint crates of EARLY WONDER brought \$13.00 on the Benton Harbor Wholesale Fruit Market—largest market of its kind in the world. EARLY WONDER bushes are beaming bright red with large, firm, luscious berries long before other Red Raspberries are ripe. Ripens ten days earlier than Latham, thus avoiding price competition and insuring top market prices. EARLY WONDER bears over a long fruiting season, producing earliest and holding its own until the last of the Raspberry season.

Labor Saver

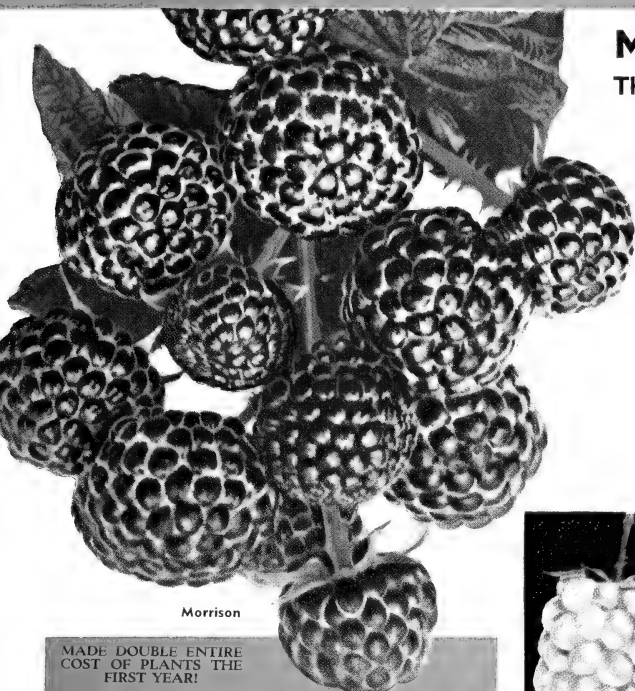

Commercial growers will appreciate these stickerless plants as they can be handled easier, and more cheaply. The home gardener will enjoy raising these Thornless Red Raspberries.

Sold Exclusively by Westhauser's Nurseries

After years of constant observation of the habits of this berry we have come to the conclusion that Early Wonder should be introduced to the Raspberry world, and made available for all Raspberry lovers.

We have a limited amount of these plants to offer our customers for 1943. Order now before our supply is exhausted, obliging us to return your money. Why wait until 1944 to get your start? Be the first in your locality to introduce this outstanding variety.

WESTHAUSER'S RASPBERRIES

Morrison

MADE DOUBLE ENTIRE
COST OF PLANTS THE
FIRST YEAR!

Mr. W. J. Beuschlein of Detroit, Mich., writes:
"I want to tell you about the Latham transplants I bought of you. I set out 500 plants in March and in July I sold enough of these wonderful berries to pay for more than double the cost of the plants. I never heard of such a remarkable record for the first year. Next spring I will set out five acres; can you supply me with plants? I am more than satisfied and thank you for your co-operation."

WHITE BLACKBERRY

Strange as it may seem, this is a real creamy white honey sweet blackberry. Mixed with the jet black ones for dessert, it makes a most wonderful dish. The fruit is about the size of Alfred with few seeds and quite sweet when fully ripe. The bushes are good, strong growers and very productive. This is not a worthless novelty, but a fruit of real value, and should be in every garden. Two-year giant transplants, bushes which will bear a good crop of berries this year, starting in August.

1-yr., No. 1—20c each; 6 for 90c; 12 for \$1.50; 25 for \$2.50.

Giant Size Trees

7-8 ft., Caliper 1 inch and over

Wealthy, Red Delicious, Yellow Transparent, Snow Apple. \$2.00 each; 6 for \$10.00; 12 for \$18.50.

Wealthy

DOUBLE RED DELICIOUS. (Fall, winter.) This new Double Red Delicious colors about 3 weeks earlier than the common Delicious. In August, when the regular Delicious are still green, Double Red Delicious are red all over and are ready to bring fancy prices. Our supply is limited—order early and play safe.

JONATHAN. (Late fall, winter.) Grand, good winter Apple. Bright, solid red. Flesh white, sometimes tinted with red; firm, fine, crisp and tender. A splendid family sort and highly profitable for market. Tree long-lived, productive and an early bearer. Keeps well and will stand much handling.

TURLEY'S WINESAP. (Winter.) The old Winesap did not have enough red color. Turley's Winesap is a cross between a Rome Beauty and a regular Winesap; is dark red when ready to pick. One of the firmest Apples; keeps until spring.

MCINTOSH. Medium in size. Fruit is beautiful red, somewhat striped. Flesh is white, crisp, and highly flavored. The tree is hardy and vigorous, and starts to bear young, and heavily. A favorite market and eating Apple. Ripens in September and October. Good storage Apple.

SNOW APPLE. Medium. Deep crimson, flesh white, very juicy and tender.

YELLOW TRANSPARENT. (Early.) The finest extra early yellow Apple. Ripens late in July and continues in season until September. Fruit good size, waxy yellow. Flesh white, mild, juicy, sweet.

WEALTHY. Ripens late summer and early autumn. Perfectly hardy, vigorous and productive. Fruit large, red streaked with white. Quality good. A profitable market sort.

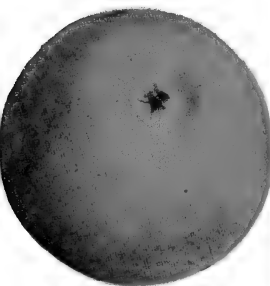

APPLE TREES

The New HARALSON APPLE

This new variety stands in a class by itself on account of its hardness. It is the coming Apple for the cold Northwest. Comes into bearing very early in life, and is a vigorous grower. Fruit is good size, red and long keeping. Very good eating Apple. If you are looking for an Apple that will bear where it gets 40 degrees below zero, order Haralson.

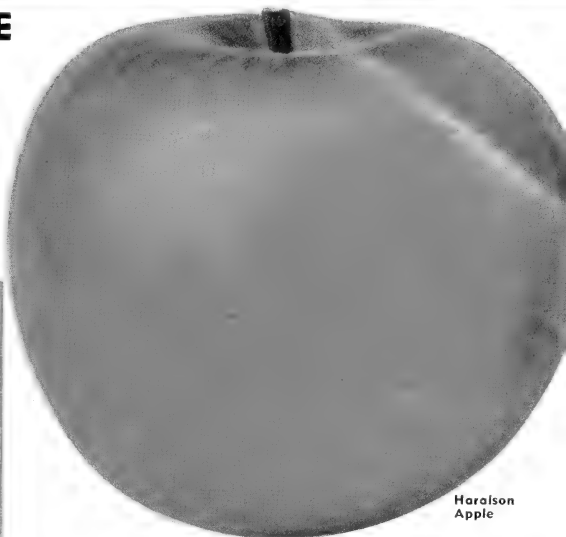

HYSLOP Crab Apple

Excellent for preserves and jellies. A heavy, regular producer. Fruit red, round, smooth; flesh yellow, sub-acid.

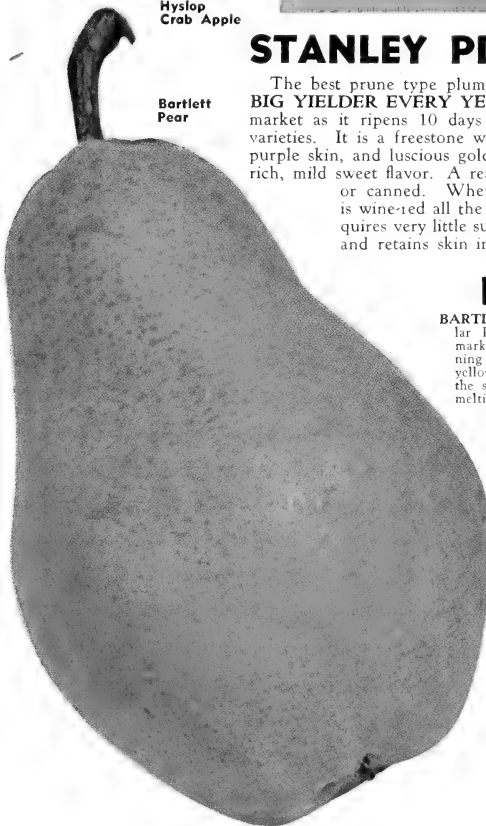

Haralson Apple

Bartlett Pear

STANLEY PRUNE PLUM

The best prune type plum. BEARS SECOND YEAR. BIG YIELDER EVERY YEAR. Gets top prices on the market as it ripens 10 days earlier than other varieties. It is a freestone with beautiful bluish purple skin, and luscious golden flesh that has a rich, mild sweet flavor. A real treat either fresh or canned. When canned the fruit is wine-red all the way through. Requires very little sugar, holds its shape and retains skin in cans.

Stanley Prune

PEARS

BARTLETT. The most popular Pear for home use and market; a leader among canning Pears. Large, golden yellow with reddish blush on the sunny side. Flesh tender, melting and juicy, with delicious, musky flavor. Tree vigorous, erect, bears abundantly.

KIEFFER. (Fall.) Large, handsome appearance; rich golden yellow, sometimes tinted red on the sunny side; bears largest, most consistent bumper crops. Wonderful keeper and an astonishing long distance shipper. Tree hardy, very strong grower, bears at an early age, producing phenomenal crops.

SECKEL. One of the richest and highest flavored Pears known; always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. September and October.

Green Gage Plum

Large round greenish yellow plum with a remarkably sweet flavor. Almost lacking of any acid. Tender yellow flesh with freestone pit. Hardy, regular bearer.

Green Gage

REDHAVEN *Peach*

**Earliest, Dazzling All-Red,
Self-Pollenizing Peach.
Equality Unpared.**

REDHAVEN was originated at the South Haven Experiment Station. A cross between the Hale-Haven and Kalhaven. After numerous tests it has proved to be a winning variety and is positively the brightest introduction the Peach world has ever seen.

The Maturity of Redhaven is From Three Weeks to One Month Before Elberta

During the early Peach season, while the Peaches are green, Redhaven is of a bright brilliant red, ripening three weeks to one month before the standard varieties, this making it assured of avoiding price competition and obtaining top market prices. A sure hit, and big money maker.

REDHAVEN is a fruit of medium size, free-stone, self-pollenizing, completely covered with a bright red, smooth skin. It is rich in flavor, sweet and abundantly juicy, meat being of a fine grain and red to the pit. Get started now with Redhaven—the true money maker.

Prices: 3-4 ft., 7/16 in. caliper trees, 75c each; 3 for \$2.00; 5 for \$3.00; 10 for \$5.50; 25 for \$11.00; 100 for \$40.00.

Large trees, 4-5 ft., 9/16 in. caliper, \$1.00 each; 3 for \$2.50; 5 for \$4.00; 10 for \$7.50; 25 for \$15.00; 100 for \$50.00.

SEEDLESS PEAR

(Patent Pending)

Endorsed by Prof. Ellenwood, Ohio Agricultural Experiment Station. Triumphs in quality and flavor. Every bit a delight! Smooth and melting, juicy, sweet and packed full of rich flavor. No seed. No core. Just solid white

Close-up of
3-year-old
Pear Tree
Showing
Large
Yield

Pear all the way through. As large as the largest Bartlett. Waxy yellow skin with russet flecks and red cheek. Easy to can. Serve smooth halves or whole Pears for fine salads and desserts. A practical, high grade fruit for market. Ripens ten days after Bartlett. Trees usually bear when three years old, and produce enormous crops.

Prices: 9/16 in., 3½ to 4½ ft. trees \$1.00 each; 5 or more trees, 75c each. 11/16 in. and over, quick fruiting size, at \$1.25 each; 5 or more \$1.00 each. No Discount.

COTONEASTER

Divaricata

A Beautiful Uncommon Shrub

This unusual shrub has a graceful, spreading habit of growth, making it ideal for planting in front of taller growing shrubbery. The tiny, dark green leaves are shiny like holly leaves, most unusual. In fall the leaves turn red and orange and hang on the bush well into the winter. White flowers are produced in great profusion, followed by red, egg-shaped fruits in beautiful, conspicuous clusters. Hardy and easy to grow.

Fortunately we have a supply of strong, 18 to 20 inch plants that we are offering our customers this year at the exceptionally low price of ONLY 12-yr. plants, 50c each; 3 for \$1.00; 6 for \$1.90; 12 for \$3.50.

ELBERTA

Midseason. The Standard of All Peaches

The outstanding midseason variety by which all midseason Peaches are judged. Grown over the entire country for both commercial and garden purposes. Very large, yellow with red blush cheek, very juicy, highly flavored. Hardy, vigorous grower, does well in all Peach growing sections. Ripens fore part of September. Write for special prices on large quantities.

FERTILE HALE

U. S. PLANT PATENT No. 175

At last we have a Peach as showy and as large in size as the J. H. Hale, which does not require interplanting in order to cross-pollinize. The trees are more vigorous and harder in bud than the J. H. Hale; test trees of the Fertile Hale at the Michigan State Experiment Station came through with a crop when the J. H. Hale and Elberta had practically a crop failure. This again proves extreme hardiness for this remarkable variety. The Fertile Hale ripens about five days after the Elberta; color yellow with deep carmine blush; a good shipper. This variety should by all means be included in every orchard planting. This patented Peach is handled under a license. Prices are net, no discount.

HALE-HAVEN

(Early Yellow Freestone)

This wonderful new Peach was introduced by the Michigan State Experiment Station, South Haven, Michigan. It is a cross between South Haven and J. H. Hale. A large, beautifully colored, yellow-fleshed Peach ripening about two weeks before Elberta, a perfect freestone, extremely high color; colors a few days before it is ripe on the tree, therefore can be picked reasonably green for long distance shipping. Write for special prices on large quantities.

TREE STRAWBERRY

or Strawberry-Raspberry

A very unique ornament as well as fruit bearing plant for the garden. Each year there is a new top growth, 15 to 18 inches high, and the fruit is borne in June on the same season's growth. The roots do not have to be transplanted and are good for many years. The fruit is large, cardinal-red, cone-shaped. It is the size of a strawberry. Prices: 6 for 60¢; 12 for \$1.00; 25 for \$1.75; 100 for \$6.00.

Juneberry

JUNE BERRY

Rare Ornamental Flowering and Fruiting Shrub

Is a tree-bush, grows to 6 feet high and spreads wide at the top; stems are shiny red in the winter, covered with white blooms early in the spring, thus making it a rare ornamental shrub. The blooms are followed by large, grape-size berries, reddish purple. Flavor like blueberry or huckleberry but not as acid. Edible and relished by all.

Prices: 2 to 3 ft. tall, \$1.00 each; 3 for \$2.50; 6 for \$4.00.

Juneberry Bush

CHERRY TREES

We list only the finest varieties

WINDSOR

(Sweet). A late variety, valuable for market and desirable for home use. Fruit large, dark red. Flesh firm and sweet. Resists rot and clings to tree long. Write for special quotations on larger lots. Prices: 4 to 5 ft., 9/16 in. caliper, 75c each; 3 for \$2.10; 6 for \$4.00; 10 for \$6.50; 25 for \$15.25; 100 for \$23.00. Large Quick Fruiting Size, \$1.00 each.

LARGE MONTMORENCY

The Best Sour Cherry

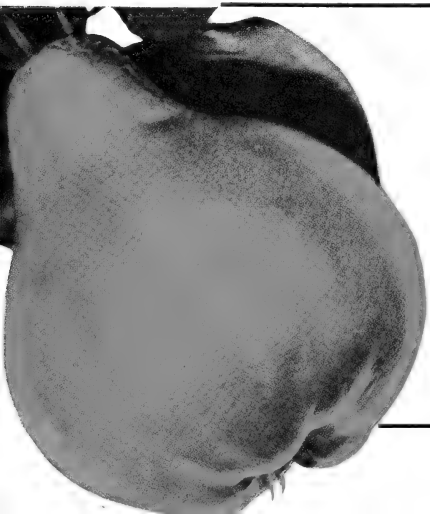

Best large, late pie Cherry, ripening the latter part of June. The fruit is extra large, bright red, firm, and fine for shipping. A strong grower, perfectly hardy, bears young, and a full crop.

This variety is very scarce the country over; order early and avoid disappointment. Write for special quotations on larger lots. Prices: 4 to 5 ft., 9/16 in. caliper, 62c each; 3 for \$1.60; 5 for \$2.60; 10 for \$4.95; 25 for \$11.50; 100 for \$43.50. Large Quick Fruiting Size, \$1.00 each.

SCHMIDT

The Best Dark Sweet Cherry

An excellent market Cherry. Fruit is very attractive and keeps well. Deep crimson-red color. A heavy producer of extra large, tender, juicy fruit. Write for special quotations on larger lots. Prices: 4 to 5 ft., 9/16 in. caliper, 75c each; 3 for \$2.10; 6 for \$4.00; 10 for \$6.50; 25 for \$15.25; 100 for \$53.00. Large Quick Fruiting Size, \$1.00 each.

QUINCE

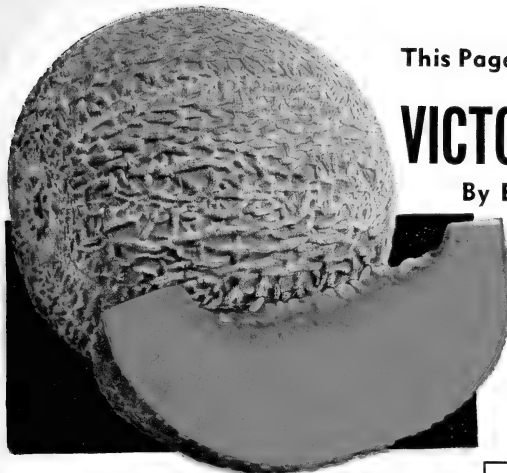

ORANGE. We list only this one Quince, as we consider it by far the best. The trees commence to bear very young and produce big crops. Fruit is excellently flavored and of large size.

Prices: 9/16 in., strongly rooted, 75c each; 3 for \$2.10; 5 for \$3.40; 10 for \$7.00.

APRICOTS

MOORPARK. Large, roundish oval, pale orange with a faint touch of red on cheek; yellow flesh; ripens first of August. Prices: 9/16 in., strongly rooted, 85c each; 2 for \$2.40; 5 for \$3.75; 10 for \$7.50.

\$1

WATERMELON, King of the Earlies

This medium sized, extra early striped variety is hard to beat for the northern part of the United States. Gets red clear to the outside and as tender and sweet as can be. Truly a wonderful melon. Price, pkt., 20c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; 1 lb., \$3.00. No discount.

PEPPER, Early Fordhook

The earliest thick-fleshed, large, dark green sweet Pepper. Brilliant red when ripe. Pkt., 30c; $\frac{1}{2}$ oz., 60c. No discount.

New! MINGOLD TOMATO

Early, productive, more healthful. Now Yellow Tomato Juice that is delicious, more healthful, richer in Vitamin D. Think of the tasty, colorful combination salads. Less acid, fine for marmalade. Originated by Dr. Troy Curran of Minnesota Agricultural Experiment Station. Very hardy, thick-skinned, uniform, delicious flavor. Ripens early. Plants should be staked. Packet of over 150 seeds, 25c each; 2 for 35c; 10 for \$1.00. No discount.

Westhauser's

New! RED GIANT TOMATO

The largest rich, red Tomato. Solid thick meat, few seeds. Medium early. Pkt., 30c; $\frac{1}{2}$ oz., 60c; oz., \$1.00. No discount.

New 60-Day HYBRID SWEET CORN

Finest Quality
Really Early

Brings 40c to 60c a Doz.

Without a doubt the finest early variety in cultivation for home and market gardens. Earliest of all quality Hybrid Sweet Corn. Ready for market in 60 days. 12-rowed, golden yellow ears, with small cob, on stocky 4-ft. stalks. Brings 40c to 60c a dozen. $\frac{1}{4}$ lb., 25c; $\frac{1}{2}$ lb., 45c; 1 lb., 65c; 2 lbs., \$1.25; 5 lbs., \$2.75.

"BEST SWEET CORN"

Says Mr. Wayne R. Jones of Appleton, Wis. September 29, 1941.

The 60-Day Hybrid Sweet Corn I bought from you last spring was the finest I ever saw. I examined much of this corn sold here in our Food Department. Would like to reserve 10 pounds for next year.

"YELLOW TOMATO JUICE IS EXCELLENT"

Says Dr. Frank Washick of Philadelphia. August 2, 1941.

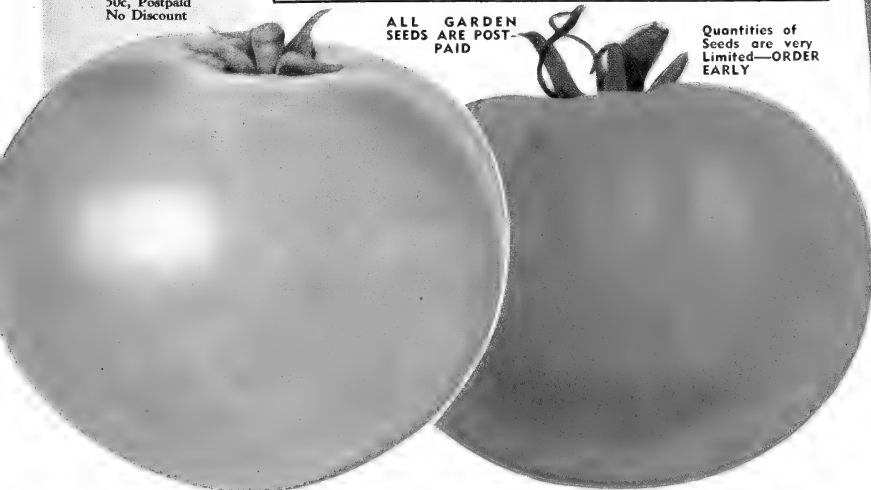

I want to give you some information on the Yellow Tomato. Not only did it outbear Beefsteak, Oxheart, and Stone Tomatoes, which I also planted, but the Yellow Tomato Juice is excellent. I certainly am going to order more of this seed next year.

WESTHAUSER'S SHADE TREES

CHINESE ELM

Very hardy and a splendid tree for the drier portion of our country. A rapid grower, well rounded head, grows to a tall, spreading tree. Almost any soil suitable. Our trees are very sturdy, 4 years old, twice transplanted and cannot be compared with spindly 1- or 2-year-old trees grown on muck land. 3-4 ft., bushy trees, 30c each; 10 for \$2.50; 100 for \$20.00. 6-8 ft., bushy trees, 75c each; 10 for \$6.50. 8-10 ft., bushy trees, \$1.50 each; 10 for \$12.50.

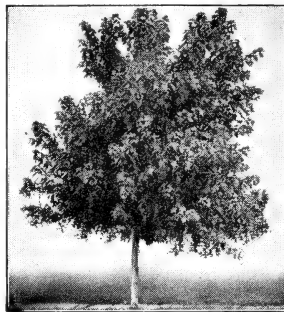

SUGAR MAPLE (Rock Maple). A well known native tree, having a very symmetrical, dense head. One of the best shade trees for street or park. 4-5 ft. trees, 45c each; 3 for \$1.25. 7-8 ft. trees, 75c each; 3 for \$2.00.

SILVER MAPLE. Rapid growing tree, producing a quick shade, suitable for street or park. Leaves irregularly indented, bright green above, silver beneath. 3-4 ft. trees, 30c each; 10 for \$2.25. 4-6 ft. trees, 50c each; 3 for \$1.25.

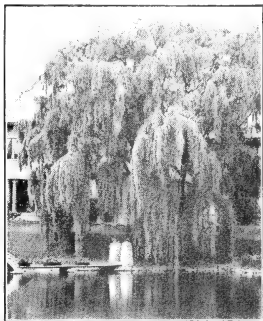

WISCONSIN WEEPING WILLOW. Grows rapidly; long, fine leaves on long sweeping branches reach the ground. 4 ft. and up trees, 40c each; 3 for \$1.00; 5 for \$1.50; 10 for \$2.75.

LOMBARDY POPLAR. Tall and slender tree with bright green leaves and silvery appearance on under side. 5-6 ft. trees, 40c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.25; 25 for \$6.00.

MAY DAY TREE. Long clusters of fragrant white flowers to cut for bouquets before other trees bloom! Small fruits attract birds. Extremely hardy. Grow in bush or tree form. Grows 20 feet. Large, 4-6 ft., quick blooming size, \$1.00 each; 3 for \$2.50.

Lombardy Poplar

Sugar Maple

May Day Tree

NEW BABY'S BREATH

(Gypsophila Repens Bodgeri)

This new plant is ideal for borders and rock gardens. It comes into flower early in the spring and continues throughout the entire summer. The flowers are double; first, pure white, later flesh-pink. Flowers can be picked if so desired and will make wonderful little bouquets alone or they make up beautifully in combination with other flowers. It is an everblooming perennial and will give continuous color. **HARDY**—will thrive in most any type of soil in semi-shade or full sun. Grows about 12 inches high and as it gets older will spread to about 2 feet. Foliage light green, leaves pointed. Does not lose its leaves until the beginning of real winter. Prices: 40c each; 3 for \$1.00; 6 for \$1.85; 12 for \$3.45. Prepaid.

Baby's Breath

EARLY DOUBLE DAISY

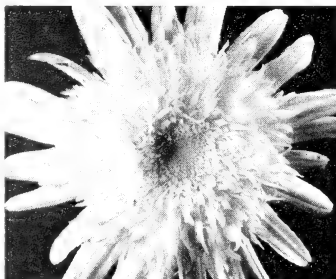

IMPROVED WHITE SWAN. This charming Daisy has a double, fluffy center as shown in the picture. When the plants are established they will produce 15 to 30 pure white flowers per plant. Stems grow to be 24 to 30 inches high. Blooms appear for Memorial Day in most sections and continue throughout June. **HARDY.** Decidedly beautiful. Plant 12 to 15 inches apart. Prices: 35c each; 2 for 60c; 4 for \$1.00; 6 for \$1.45. Prepaid.

Grows to a height of 6 feet. 12 to 15 in., 25c each; 3 for 40c; 10 for \$1.25; 20 for \$2.00; 50 for \$3.50; 100 for \$5.50. 2 ft. and up, 35c each; 3 for 80c; 10 for \$1.50; 25 for \$2.80.

Hydrangea A. G.

Hydrangea A. G.

HILLS OF SNOW. Big, flat panicles of white flowers come in midsummer and last all fall. Wide leaves. Bushy. 3- to 4-foot grower. 2-year, well branched, 12- to 18-inch clumps, full blooming-age, 40c each; 3 for \$1.10.

**Forsythia
(Golden Bell)**

Earliest blooming. Golden, bell-shaped flowers. Blooms often before the snow is gone. Tall grower. 2-yr., blooming-age, 40c each; 3 for \$1.10.

**Spirea
Anthony Waterer**

Bright crimson flowers blooming at the end of June, and if flowers are removed when they fade will bloom until frost. Dwarf grower, not over 2½ feet at maturity. 2-yr. blooming size plants, 35c each; 3 for \$1.00. 3-yr., 2½ ft. plants, 60c each; 3 for \$1.50.

Weigela Rosea

Sprays of large pink flowers. Leaves beautifully variegated green and white. Grows 3 to 4 feet high. 2-yr., strong, blooming size, 40c each; 3 for \$1.10.

Forsythia—Golden Bell

Snowball

Well known; flowers grow in large, ball-like clusters, snow-white; blooms early. 2-yr., 40c each; 3 for \$1.10.

Snowberries

CHENAULTI RED. Graceful branching covered entire length with tiny winglike leaves which color red in fall. Tiny pink blooms, large clusters of maroon berries. Dry them for winter bouquets. 40c each; 3 for \$1.10.

Hydrangea P. G.

Giant heads of creamy white flowers, 6 to 9 inches long, turn to rose in autumn. Can be dried for winter bouquets. Fine for foundations, borders, groups. 2-yr. blooming-age, 40c each; 3 for \$1.10.

Honeysuckle

TARTARIAN. The finest and best known of the Bush Honeysuckles. Has somewhat spreading branches and bright green foliage. The flowers are of bright pink color, followed by red berries which ripen in midsummer and cling to the bush for several weeks. 2-yr., blooming-age, 40c each; 3 for \$1.10.

Red Snowberry

HEDGE PLANTS

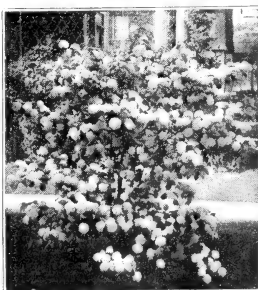

CHINESE ELM HEDGE. The very finest of all hardy hedges, very fast grower, can be trimmed to any size or height. Plant 12 to 18 inches apart along walks, drives, lot lines, as windbreaks, or to hide undesirable views. Cut tops back to 12 inches to cause plants to branch thickly from the bottom. Grows 12 to 15 feet in height. 25 for \$1.25; 50 for \$2.00; 100 for \$3.00; 500 for \$12.00.

CALIFORNIA PRIVET. This variety has long been known as one of the most beautiful hedging plants. It grows rapidly and is free from insects and scale. Leaves are dark, glossy green. Not dependably hardy in some northern sections. 18 to 24 in., strong plants, 10 for \$1.10; 25 for \$1.75; 100 for \$6.40.

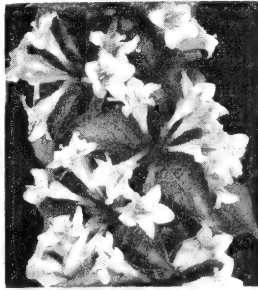

AMUR RIVER PRIVET. The hardiest and one of the most beautiful hedges. Glossy green leaves stay on long into the winter. 18 to 24 in., strong plants, 10 for \$1.10; 25 for \$1.75; 100 for \$6.40.

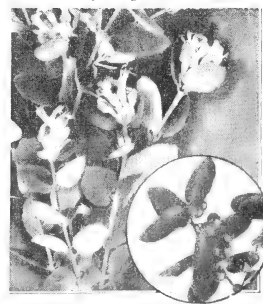

Spirea Anthony Waterer

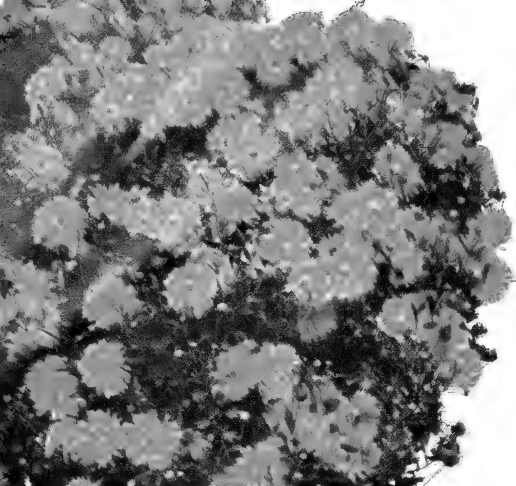

Old-Fashioned Snowball

Weigela Rosea

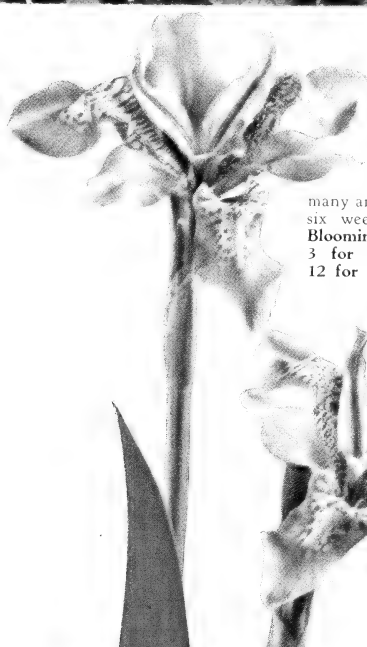

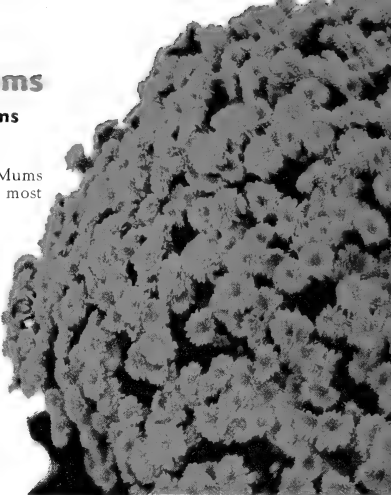

Honeysuckle, Tartarian

Egyptian 'Mums

**Thousands of Blooms
4 for \$1.25**

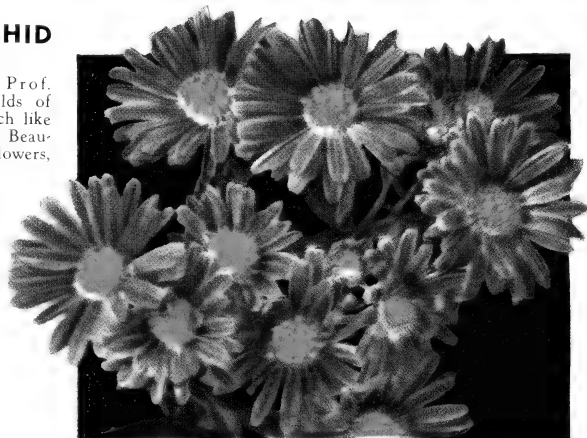

Gorgeous Egyptian 'Mums (Cushion type). Now in most beautiful colors, a deep golden yellow and a glamorous crimson-red. What a contrast! Visualize one plant, a complete flower garden of its own. From 500 to 1000 blooms the first year. (Guaranteed to bloom). Many more the next year. Blooms late in July and continues until winter. Flowers measure from 1½ to 2 inches across. Plant grows from 1½ to 2 ft. high. Prices: 2 for 75c; 4 for \$1.25; 6 for \$1.90; 12 for \$3.25.

HARDY ORCHID

(Shilka Iris)

Discovered by Prof. Hansen in the wilds of Siberia. Looks much like expensive Orchids. Beautiful, harmonizing flowers, many are double. Blooms for six weeks or more. Prices: Blooming size, 40c each; 3 for \$1.10; 6 for \$1.60; 12 for \$2.75.

BLUE SKYLARK ASTER

Planted in May, we actually counted 800 blooms on one plant. We are listing this wonderful Aster with the 'Mum family. They have about the same blooming season, from early September to November. Blue Skylark is a very thrifty plant, grows from 2½ to 3½ feet high, can be planted for border planting or in back of smaller flowers like Glads or 'Mums on account of its great height. They are fine for individual bouquets or fit in beautifully with Glads. 'Mums, or other fall flowers. Prices: 25c each; 3 for 70c; 10 for \$2.00; 25 for \$4.00.

HYBRID FRENCH LILAC

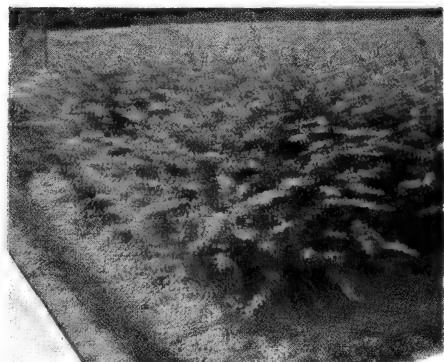

Fancy — Quick Blooming

Way ahead of all other types of Lilacs. These varieties bloom very young, with mammoth panicles measuring 7 to 12 inches; clusters of gorgeous, fragrant blossoms. Budded on hardy non-suckering roots.

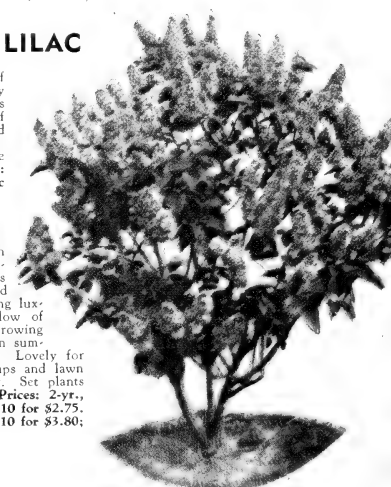

No waiting for flowers — they have a few blooming buds now. Prices: Sturdy, 2-yr. blooming size, 60c each; 2 for \$1.10; 10 for \$4.25.

RED BARBERRY

No other shrub can compare with the striking brilliance of our double-red strain of Barberry. Its abundance of thick purplish red leaves glisten in the sun, contrasting luxuriously with the green and yellow of other plants. Bushes have low-growing habit. Can be pruned any time in summer to desired height and width. Lovely for borders, hedges, foundations, groups and lawn specimens. Red berries in winter. Set plants 1½ feet apart, in full sunlight. Prices: 2-yr., 15-18 inch, 40c each; 4 for \$1.50; 10 for \$2.75. 18-24 inch, 60c each; 4 for \$2.00; 10 for \$3.80; 20 for \$7.25.

Red Barberry

Cut-Leaf Weeping Birch

Old-Fashioned Bleeding Heart

Old-Fashioned Bleeding Heart

3 for \$1.25

Heart-shaped flowers with little pendants like little drops of blood. Plant likes shade, grows 24 inches high with 15- to 18-inch spread. Blooms in May. Prices: 45c each; 3 for \$1.25. Discount allowed.

Blood-Leaf Maple

Blood-Leaf Maple

A beautiful rare ornamental Maple. It has indented blood-red leaves in the summer which dulls to a bronzy purple-red or bronzy green in the fall. Height is about 10 feet. Price: 2 ft. and up, branched, \$1.60 each; 3 for \$5.00; 6 for \$9.00.

Cut-Leaf Weeping Birch

A tall, slender tree of vigorous growth, with graceful drooping branches, silvery white bark and delicately cut foliage. Reaches height of 30 to 40 feet. Plant 20 feet apart. Prices: 4 ft., \$1.50 each; 2 for \$2.75; 3 for \$4.00. 5-6 ft., \$2.50 each; 2 for \$4.50; 3 for \$6.25.

PURPLE FRINGE

(Smoke Tree)
(Rhus Cotinus)

An enchanting treelike shrub, enveloped in mid-summer with showy masses of purplish misty flowers resembling beautiful clouds of drifting smoke. Attractive brilliant scarlet and golden autumn foliage. A hardy recognized garden beauty. Heavy, 2-yr., 4 ft. and up, 90c each; 3 for \$2.50.

(No Baby Sizes this year.)

European Mountain Ash (Sorbus Aucuparia)

A hardy, medium size tree: head dense and regular. Covered from July until winter with large clusters of bright red berries. Reaches height of 25 to 30 feet. Beautiful and attractive. Prices: Strong, 5-6 ft. trees, \$1.00 each; 3 for \$2.90. 6-8 ft. trees, \$2.00 each; 3 for \$5.50.

Purple Fringe—Smoke Tree

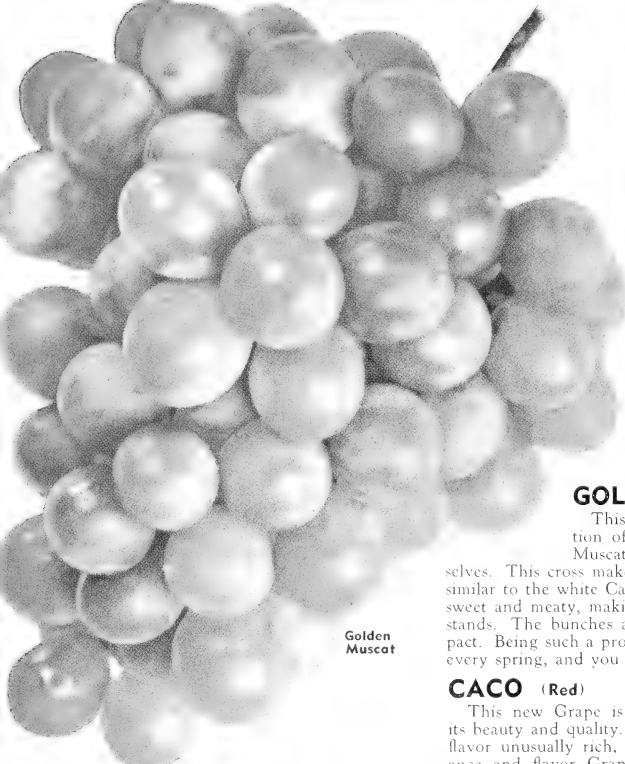

BLUE HYDRANGEA

Beautify your lawn with two or more Blue Hydrangea, space them 2 feet apart. They grow 2 feet tall, and get more beautiful each year. Blooms pink on the new wood, and blue on the old wood. These flowers make a charming bouquet, and are the pride of your garden. Blue Hydrangea likes full sunlight or semi-shade. A teaspoonful of Aluminum Sulphate three times every summer or the addition of Peat Moss provides acid. Roots are hardy, and will put forth new growth even if the wood may freeze back in winter. A light mulching helps in colder climates. 2 for \$1.00; 10 for \$4.50.

FREDONIA (Black)

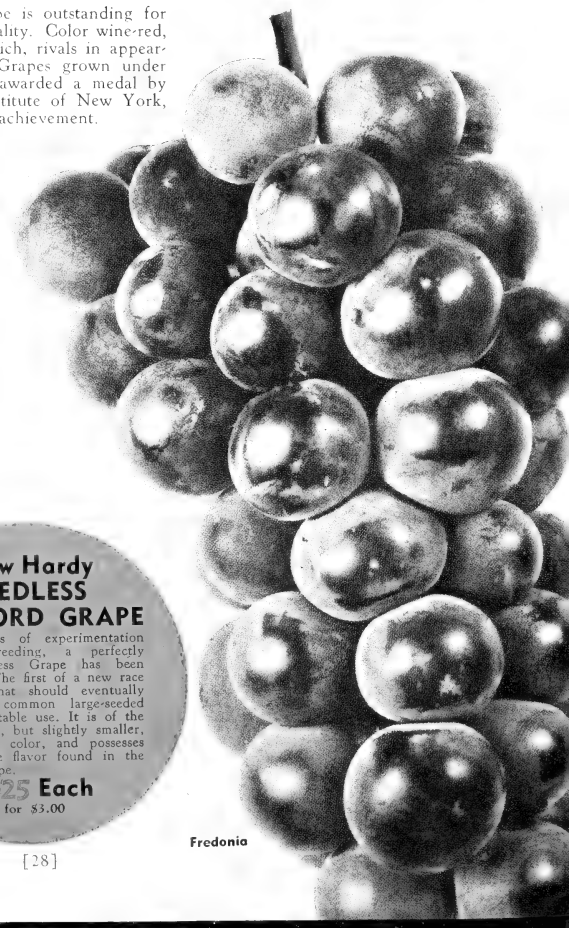

A winner. This new variety threatens to displace all other black Grapes. A new, very early Grape, originated and thoroughly tested by the New York Experiment Station. The clusters and berries are large, with excellent flavor. Ripens fully ten days before Moore's Early and is an excellent shipper, as it does not crack. This Grape fills a long-felt need—a juicy, delicious black Grape that ripens early. Vine vigorous and productive. One of the best new varieties.

GOLDEN MUSCAT

This new hardy California Grape can now be grown in every section of the country. This variety is the result of the cross of the Muscat Hamburg and Diamond, which are very desirable in themselves. This cross makes a hardy, heavy bearing vine, and the quality of the fruit is similar to the white California Grape sold at all fruit markets. The berries are large, sweet and meaty, making it a wonderful variety to grow for home use and roadside stands. The bunches are large, heavy, broad shouldered, and tapering. Very compact. Being such a productive plant, we advise a good complete commercial fertilizer every spring, and you will be delighted with the crop. Supply of plants limited.

CACO (Red)

This new Grape is outstanding for its beauty and quality. Color wine-red, flavor unusually rich, rivals in appearance and flavor Grapes grown under glass. Caco was awarded a medal by the American Institute of New York, a high honor for achievement.

Fredonia

New Hardy SEEDLESS CONCORD GRAPE

After years of experimentation and cross-breeding, a perfectly hardy, seedless Grape has been developed. The first of a new race of Grapes that should eventually replace the common large-seeded varieties for table use. It is of the Concord type, but slightly smaller, blue-black in color, and possesses the same fine flavor found in the Concord Grape.

Westhauser's Heavy Rooted **GRAPE VINES** at Wholesale Prices

OUR GRAPE PLANTS are known the country over for a fast growing, heavy bearing strain. They will produce delicious fruit, when established, for a long time. Many thousands of our customers are reaping both pleasure and profit from their investments.

CONCORD (Blue)

Is the leading variety for table use, also is supreme for jelly and wine purposes. They grow on all kinds of soil and produce enormous crops of fruit. The bunches are large and compact, the berries are dark blue and very juicy. Many thousand carloads and truckloads are shipped every fall from the great Michigan Fruit Belt. Grape plants are very scarce the country over this year, it will pay you to order early and have your plants reserved.

NIAGARA (White)

This is the leading white Grape grown. Berries are large and fine flavored. Ripens about the same time as Concord.

The Two Best Varieties of ASPARAGUS

Westhauser's Rust-Proof Strain for Home and Commercial Planting

Martha Washington Asparagus

The demand for this delicious vegetable increases every year—the first greens from your own garden in spring. 100 to 150 roots will supply the average family.

FOR COMMERCIAL GROWING

The first money crop in spring. Fancy stalks for stores and markets; the No. 2 grade for canning and canning factories; easily harvested. Here in Michigan the harvest commences the latter part of May. An asparagus patch once established will last from 10 to 20 years. 5,000 roots plant one acre.

New Paradise Asparagus Giant Stalks — Will Bear Next Year

Save a Full Year — Plant This Spring, Harvest the Following Year!

Matures one year earlier. Very large stalks of exceptionally fine quality; unusually heavy producer. Here we have a better Asparagus that grows a larger crop a FULL YEAR EARLIER, and continues to bear heavier crops year after year. That means returns ONE YEAR SOONER and larger returns each year after that. It means MORE PROFITS in LESS TIME.

The tender, crisp stalks are so large it takes only 6 to 8 to make a pound. Its taste it is milder than other varieties. For the home gardener it is the best possible variety to plant because the same space occupied will produce so much more, and better Asparagus. Paradise Asparagus, like Martha Washington, is highly resistant to rust.

PRICES: 1-yr., 25 for \$1.00; 50 for \$1.50; 100 for \$2.50; 250 for \$5.00; 1000 for \$15.00. 2-yr., 12 for 75c; 25 for \$1.00; 50 for \$1.50; 100 for \$2.50; 25 for \$5.00; 50 for \$9.75; 1000 for \$19.25. 3-yr., 12 for \$2.00; 25 for \$3.00; 50 for \$5.00; 100 for \$9.00.

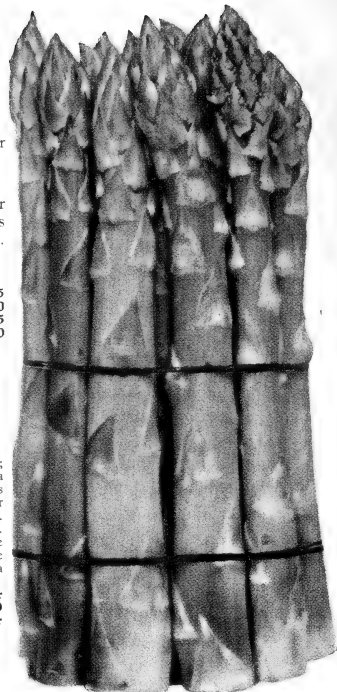

Red Lake Currant

Out-bears Others Two to One

Double your crop and profits by raising these big, very productive Currants. The bushes are thrifty and exceptionally hardy, very easy to grow. The berries are a pleasure to pick, being large, dark red in color, and on long, well filled bunches. Originated in the Northwest where the temperature reaches 40 below zero. They ripen in early midseason and last over a long period. Order early; supply limited. 2-yr., No. 1 plants, 45c each; 3 for \$1.00; 10 for \$2.90; 25 for \$5.90; 100 for \$20.00.

MacDonald Rhubarb

The last word in Rhubarb. In describing this variety, Prof. L. G. Bunting, of MacDonald College, in Quebec, Canada, where it originated, states: "It is a very highly colored, attractive red stalk, of large size, productive, very tender and succulent, and of excellent quality, and particularly valuable for pies and desserts. Its color, when cooked without peeling, is as attractive as that of Raspberries." Not grown from seed. Plants propagated from divisions. Try some this year. You'll like it. 40c each; 3 for \$1.00; 6 for \$1.50; 10 for \$2.90. For larger plantings, write for special quotations.

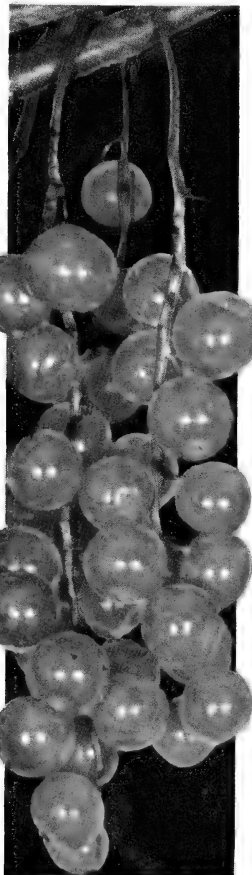

Paradise Asparagus

Downing Gooseberry

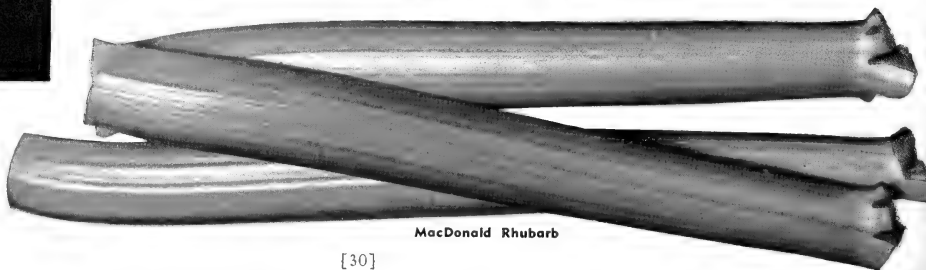

Large, green fruit, fine sweet flavor, best shipper and canner. Very thrifty grower. 2 yr., No. 1 plants, 45c each; 3 for \$1.00; 10 for \$2.90; 25 for \$5.90; 100 for \$20.00.

← HOPA Flowering Crab

Hopa is undoubtedly the most beautiful flowering crab that can be grown successfully in the North. It is an upright tree entirely covered with beautiful rose-crimson flowers which last a long time, followed by the fruit which is red throughout and lingers until late fall. The fruit is excellent for canning or jellies. Tree is very hardy and disease free. Most sensational for single or group planting. Heavy, 3½-4 ft. and up, \$1.00 each; 3 for \$2.50; 6 for \$4.75.

HANSEN BUSH CHERRY

Bore a Crop Last Year, Will Produce a Heavy Crop This Year

A rapid growing shrub, can be planted singly or in groups, also makes a gorgeous hedge with its snow-white blooms. Bush Cherry is easy to grow and will grow anywhere, producing large delicious plum-shaped cherries, fine for eating fresh from the bush, has a wonderful flavor; excellent for jams. The bush grows four to five feet tall with 3- to 4-ft spread. Foliage is very attractive, silvery green, turning to red and gold in the fall. These large stocky 4-year old well branched bushes cannot be compared with the regular sized bushes.

HEAVY, BUSHY, FRUITING SIZE

Loaded With Fruiting Buds. 2¼-3 ft., extra vigorous bushes, 75c each; 3 for \$1.50; 6 for \$2.50; 12 for \$4.00; 25 for \$7.50; 50 for \$13.95.
